

Minutes of SIAPWS EC Meeting 2018-1 (16.01.2018)

1. Update since last meeting

- Mats Hellman would like to take part in the SIAPWS EC as associate member.
- Mats has left the SIAPWS Course group.
- Monika will send an updated member list to Karsten. Siemens and DHI are leaving.
- Roger has experienced problems logging in to the COWI SIAPWS portal. Karsten will ask the COWI Superuser.
- Jere Espo's company is under reorganization. Jere will continue with chemistry, but at a higher level in the company.

2. Billing status

Karsten will check the billing status with IDA and inform the EC.

3. SIAPWS Water Chemistry Network

3.1. Planning of "Base Course in Power Plant Chemistry" in 2018

There has been no response from the article in the newsletter. Nobody has answered the inquiry in GoogleDocs that was announced in the article.

Mats has decided not to be a presenter at the SIAPWS Base Courses.

We need someone to take over the course "Preservation, conservation of plants" and "Water steam chemistry, conditioning, water treatment in the circuit, troubleshooting, how to attack the problem" - Jere proposes Jani from Finland to take over one or both topics. Jere will ask if he would be interested. Karsten will run the courses, if nobody else volunteers.

The dates for the first three courses need to be fixed rather quickly. Lea, Roger, and Jani/Karsten should come back with date proposals in, respectively, February, March/April, May/June, so that the dates can be announced with the next newsletter from SIAPWS

4. Next annual SIAPWS meeting

Söder Energi, 14. March 2018

Theme for the meeting: *What is going on in the Power Plant Chemistry World in the Nordic Countries?*

The technical workshop is in place. Proposals for the technical workshop:

- Valmet presentation on flue gas condensation - not commercial
- What is going on within in power plant chemistry in Finland, Jere
- Check the Norwegian contact with MR - KNTH
- What is going on in Denmark – KNTH
- Status in Sweden – Roger and Mats will discuss this.
- Start-up of Ørsted 40 MW biomass-fired plants, Monika
- Introduction to Söderenergi, Igelstaverket, Nicklas

Monika will make a Facebook event for the annual meeting, and prepare the final invitation for the meeting.

5. ICPWS conference 2018

Deadline for abstracts is coming up now, and proposals must be submitted before 30. January 2018.

- Karsten and Roger will make a presentation giving an overview on flue gas condensation plants in Scandinavian and the reuse of FGC.
- Folmer and/or Monika from Ørsted will submit an abstract on startup on SKV40 biomass-fired power plant and the FGC.
- Linda Wiig is also interested to submit an abstract, but is very hung up on writing the Energiforsk paper. Biology in reuse of FGC.
- Maybe Mats will also be interested to make a presentation.

6. The Finnish Campaign

First step – announce the date for the annual meeting.

7. Miscellaneous

“Super critical water” – is SIAPWS/IAPWS involved in that topic??

Maybe Jere could present something about this at the ICPWS conference?

8. Next EC meeting

Karsten will make the calendar booking – 2. March 2018 kl. 13:00-14:00.

Monika will mail the minutes from 2017 to the EC.
